

Associations and State Information

NH

New Hampshire Public Health Association

The New Hampshire Public Health Association (NHPHA) was established in 1990 and legally incorporated in 1992 as a 501c(3) private, not-for-profit organization. NHPHA is a member driven organization that champions public health policy and practice, enriches the workforce and inspires leaders to improve the public's health. It does so through advocacy, workforce development and public health messaging. Public health jobs are posted on the NHPHA listserv, which is disseminated to all members.

About: <http://www.nhpha.org/>

NH Department of Environmental Services

The mission of the Department of Environmental Services is to help sustain a high quality of life for all citizens by protecting and restoring the environment and public health in New Hampshire. Jobs open to non-state employees are posted on the website below.

National Information

American Public Health Association (APHA)

APHA champions health of all people and all communities and strengthens the public health profession. They speak out for public health issues and policies backed by science. They are the only organization that influences federal policy, has a nearly 150-year perspective, and brings together members from all fields of public health. The APHA website has professional development information and a Career Mart, which posts jobs from around the world.

Association of State and Territorial Health Officials (ASTHO)

ASTHO is the national nonprofit organization representing public health agencies in the United States, U.S. Territories, and District of Columbia. ASTHO's primary function is to track, evaluate, and advise members on the impact and formation of public or private health policy which may affect them, and to provide them with guidance and technical assistance on improving the nation's health. ASTHO hosts a job bank for public health careers throughout the nation.

World Health Organization (WHO)

WHO staff are united in a shared commitment to achieve better health for everyone, everywhere. They strive to combat diseases – communicable diseases like influenza and HIV, and non-communicable diseases like cancer and heart disease. They help mothers and children survive and thrive so they can look forward to a healthy old age.
